### Accounting Officer's Responsibilities and Approval

---

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and were given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

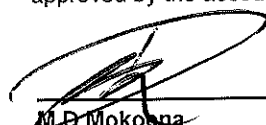

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2018 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on the National and Provincial grants for continued funding of operations. The annual financial statements are prepared on the basis that the municipality is a going concern and that the West Rand District Municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer is primarily responsible for the financial affairs of the municipality, he is supported by the municipality's internal auditors.

The annual financial statements set out on pages 5 to 72, which have been prepared on the going concern basis, were approved by the accounting officer on 31 August 2017 and were signed on its behalf by:

  
31/08/2017  
M.D. Mokoena  
Municipal Manager

## Accounting Officer's Report

---

The accounting officer submits his report for the year ended 30 June 2017.

### 1. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the continued commitment by the National and Provincial sphere of government to transfer grants to the district municipality. The accounting officer has further committed to raising funds from savings, these savings include rigorous cost containment measures to restore a positive financial position of the municipality.

The local municipalities within the West Rand remain committed to contributing funds to the District for Transformation, West Rand Development Agency, Go-West and other special programs. In addition, the municipality has set-up a project support office to assist with sourcing of external funding.

The MEC responsible for Local Government in the province, has restored the powers and functions of the WRDM in line with Section 84 of the Local Government: Municipal Structures Act. The restored powers and functions are expected to result in additional revenue streams being collected by the WRDM.

The WRDM would also further be responsible for the provision of Bulk Infrastructure within the West Rand Region.

### 2. Subsequent events

All matters and events that occurred between 30 June 2017 and the date of submission of the annual financial statements have been taken into account and appropriately reported.

### 3. Accounting Officer's interest in contracts

The accounting officer did not have any interest in any contract of the municipality.

### 4. Accounting policies

The annual financial statements are prepared in accordance with the prescribed Standards of Generally Recognised Accounting Practices (GRAP) issued by the Accounting Standards Board as the prescribed framework by National Treasury.

### 5. Accounting Officer

The accounting officer of the municipality during the year and to the date of this report is as follows:

|             |               |
|-------------|---------------|
| Name        | Nationality   |
| M.D Mokoena | South African |

### 6. Bankers

The District Municipality primarily banks with Standard Bank - Key West Branch

### 7. Auditors

Auditor General-South Africa will continue in office for the next financial period.

### 8. Non compliance with applicable legislation

Any instance of non compliance to applicable legislation is fairly disclosed in the Notes to the Annual Financial Statements.

Figures in Rand

#### Legends:

A- Application to charge fire levy to the local Municipality was declined by fiscal commission after the adjustment budget has been tabled to Council. The Municipality only charged fire prevention fees and building plans.

B- Increase in rental of facilities and equipment is due to escalation clause per the rental agreements the Municipality has with its rental customers.

C- The item was not budgeted for.

D- The Municipality charged air quality services to its customers using the tariff book for 2016/2017 which reflected tariff increase

E- The Municipality expected funds for Disaster management function, to compensate the actual cost incurred by the District for identifying sink holes in Merafong and these funds were not received as at 30 June 2017.

F- Decrease in call account and fixed deposit investment utilised during the year.

G- Not all grants were received as at 30 June 2017:  
NDPG- R6.4 million was still outstanding at year-end  
MSIG- R1 million was still outstanding at year-end.

H- A laptop was donated to the Municipality by Re-Solve.

I- Positions which were anticipated to be filled in 2016/2017 financial period were delayed due to a decline in cash flow. Only executive positions were prioritised since they were critical.

Council remuneration were under-spent since the new Council started in September 2016 and the grading of the Municipality was also assessed.

J- An increase in depreciation and amortization is due to the useful life assessment that was performed during the year. This also affected impairment loss since most assets were re-assessed for impairment and the Municipality can still derive economic benefits from these assets.

K- The finance cost relates to the leased laptops bought for Councillors through finance lease.

L- This relates to the new contract for the lease of vehicles with Afrisent and lease of photocopy machines Zevoli (Pty) Ltd.

M- The demand to repair fire engines is subsiding due to new fire engines and rescue vehicle bought through finance lease.

N- Fair value on biological assets and investment property were not budgeted for since it's a year-end estimates and requires the relevant qualified experts. Actuarial valuation was performed for medical aid liability and long service award provision. Actuarial gains relates to savings due to Ambulance staff which is no longer with the Municipality.

O- General expenses were over-spent due to the previous year's roll-over in conditional grants spent in the current year.

P- Department of Labour Assessment Provision was not budgeted for since it's a year-end estimate.

Q- Contributions from local municipalities and fire debtors were raised during the year. The Municipality has issued letters of demands to these debtors.

R- VAT receivable was not budgeted for. The Municipality claims VAT on payment basis and report on accrual basis. This depends on payments and receipts.

S- Due to cost containment measures in terms of circular 82 some of stock items were not procured during the year.

**T-** The study loan balance was adjusted due to previous years' audit query raised by Auditor General. The whole population was corrected.

**U-** This is due to increase in creditors accruals and overnight facility that was accessed during May and June 2017 to assist with third parties payments to avoid penalties. The overnight facility was interest free.

**V-** This results from actuarial valuation performed during the year and classification of short-term portion of medical aid liability

**W-** This due to the decrease in workmens compensation provision and long service award provision

**AA-** During the year the Municipality entered into finance lease agreement to lease five fire engines and five rescue vehicles due to service delivery demands.

### **1. Presentation of Annual Financial Statements**

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. The presentation currency of the financial statements is South African Rand.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period.

#### **1.1 Going concern assumption**

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

### 1.2 Transfer of functions between entities under common control

#### Definitions

An acquirer is the municipality that obtains control of the acquiree or transferor.

Carrying amount of an asset or liability is the amount at which an asset or liability is recognised in the statement of financial position.

Control is the power to govern the financial and operating policies of another municipality so as to benefit from its activities.

A function is an integrated set of activities that is capable of being conducted and managed for purposes of achieving an municipality's objectives, either by providing economic benefits or service potential.

A merger is the establishment of a new combined entity in which none of the former entities obtains control over any other and no acquirer can be identified.

Transfer date is the date on which the acquirer obtains control of the function and the transferor loses control of that function.

A transfer of functions is the reorganisation and/or the re-allocation of functions between entities by transferring functions between entities or into another municipality.

A transferor is the municipality that relinquishes control of a function.

Common control - For a transaction or event to occur between entities under common control, the transaction or event needs to be undertaken between entities within the same sphere of government or between entities that are part of the same economic entity. Entities that are ultimately controlled by the same entity before and after the transfer of functions are within the same economic entity.

A function is an integrated set of activities that is capable of being conducted and managed for purposes of achieving an municipality's objectives, either by providing economic benefits or service potential. A function consists of inputs and processes applied to those inputs that have the ability to create outputs. A function can either be a part or a portion of an entity or can consist of the whole municipality. Although functions may have outputs, outputs are not required to qualify as a function. The three elements of a function are defined as follows:

- Input: Any resource that creates, or has the ability to create, outputs when one or more processes are applied to it.
- Process: Any system, standard, protocol, convention or rule that when applied to an input or inputs, creates or has the ability to create outputs.
- Output: The result of inputs and processes applied to achieve and improve efficiency. This may be in the form of achieving service delivery objectives, or the delivery of goods and/or services.

#### Identifying the acquirer and transferor

For each transfer of functions between entities under common control an acquirer and transferor are identified. All relevant facts and circumstances are considered in identifying the acquirer and transferor.

The terms and conditions of a transfer of functions undertaken between entities under common control are set out in a binding arrangement. The binding arrangement governing the terms and conditions of a transfer of functions may identify which municipality to the transaction or event is the transferor(s) and which municipality is the acquirer. Where the binding arrangement does not clearly identify the acquirer or the transferor, the behaviour or actions of the entities may indicate which municipality is the acquirer and which municipality is the transferor.

Determining the acquirer includes a consideration of, amongst other things, which of the entities involved in the transfer of functions initiated the transaction or event, the relative size of the entities, as well as whether the assets or revenue of one of the entities involved in the transaction or event significantly exceed those of the other entities. If no acquirer can be identified, the transaction or event is accounted for in terms of the Standard of GRAP on Mergers.

## Accounting Policies

---

### 1.2 Transfer of functions between entities under common control (continued)

#### Determining the transfer date

The acquirer and the transferor identify the transfer date, which is the date on which the acquirer obtains control and the transferor loses control of that function.

All relevant facts and circumstances are considered in identifying the transfer date.

#### Assets acquired [transferred] and liabilities assumed [relinquished]

The recognition of assets and liabilities, is subject to the following conditions:

The assets transferred and the liabilities relinquished are part of what had been agreed in terms of the binding arrangement (if applicable), rather than the result of separate transactions.

#### Determining what is part of the transfer of functions transaction

Where the municipality and the acquirer have a pre-existing relationship before or when negotiations for a transfer of functions began, or where a binding arrangement is entered into during the negotiations that are separate from a transfer of functions, any amounts that are not part of what were transferred in a transfer of functions are identified. This policy only applies to the consideration received and the assets transferred and liabilities relinquished in a transfer of functions as governed by the terms and conditions of the binding arrangement.

The following factors are considered, which are neither mutually exclusive nor individually conclusive, to determine whether a transaction is part of a transfer or function or whether the transaction is separate:

- the reasons for the transaction
- the timing of the transaction

#### Accounting by the entity as transferor

#### Derecognition of assets transferred and liabilities relinquished

As of the transfer date, the municipality derecognises from its annual financial statements, all the assets transferred and liabilities relinquished in a transfer of functions at their carrying amounts.

Until the transfer date, the municipality continues to measure these assets and liabilities in accordance with applicable Standards of GRAP.

The consideration received from the acquirer can be in the form of cash, cash equivalents or other assets. If the consideration received is in the form of other assets, the municipality measures such assets at their fair value on the transfer date in accordance with the applicable Standard of GRAP. The difference between the carrying amounts of the assets transferred, the liabilities relinquished and the consideration received from the acquirer is recognised in accumulated surplus or deficit.

### 1.3 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. When any significant judgement and sources of estimation uncertainty are applicable, they have been disclosed in the relevant notes and policies.

#### Impairment testing

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable.

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

## Accounting Policies

---

### 1.3 Significant judgements and sources of estimation uncertainty (continued)

#### Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 15 - Provisions.

#### Useful lives of property, plant and equipments

The municipality's management determines the estimated useful lives and related depreciation charges for the property, plant and equipments. This estimate is based on local government norms. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

#### Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 16.

### 1.4 Biological assets that form part of an agricultural activity

The entity recognises a biological assets that form part of an agricultural activity or agricultural produce when, and only when:

- the entity controls the asset as a result of past events;
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably.

Biological assets that form part of an agricultural activity are measured at their fair value less costs to sell.

Where fair value cannot be measured reliably, biological assets are measured at cost less any accumulated depreciation and any accumulated impairment losses.

### 1.5 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

# West Rand District Municipality

(Registration number DC48)

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

## Accounting Policies

---

### 1.5 Investment property (continued)

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

#### Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the entity determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the entity determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the entity measures that investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The entity applies the cost model (as per the accounting policy on Property, plant and equipment) until disposal of the investment property.

Once the entity becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

### 1.6 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

#### 1.6 Property, plant and equipment (continued)

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

The useful lives of items of property, plant and equipment have been assessed as follows:

---

| Item                   | Depreciation method | Average useful life |
|------------------------|---------------------|---------------------|
| Land                   | Straight line       | Indefinite          |
| Buildings              | Straight line       | 7 - 30 years        |
| Plant and machinery    | Straight line       | 5 - 20 years        |
| Furniture and fixtures | Straight line       | 3 - 17 years        |
| Motor vehicles         |                     |                     |
| Specialised vehicles   | Straight line       | 5 - 20 years        |
| Other vehicles         | Straight line       | 3 - 20 years        |
| Office equipment       | Straight line       | 3 - 17 years        |
| Roads and stormwater   | Straight line       | 20 - 30 years       |
| Water                  | Straight line       | 20 - 30 years       |
| Community              | Straight line       | 20 - 30 years       |
| Emergency equipment    | Straight line       | 5 - 15 years        |
| Water craft            | Straight line       | 5 - 15 years        |
| Security measures      | Straight line       | 5 - 14 years        |
| Other leased Assets    | Straight line       | 2 - 3 years         |

---

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

Annual Financial Statements for the year ended 30 June 2017

## Accounting Policies

---

### 1.7 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

---

| Item                     | Depreciation method | Average useful life |
|--------------------------|---------------------|---------------------|
| Computer software, other | Straight line       | 3 years             |

---

### 1.8 Investments in controlled entities

In the municipality's separate annual financial statements, investments in investments in controlled entities are carried at cost.

The cost of an investment in controlled entity is the aggregate of:

- the fair value, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued by the municipality; plus
- any costs directly attributable to the purchase of the controlled entity.

The WRDA was established to promote tourism and investment in the west rand region.

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

## Accounting Policies

---

### 1.9 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

A concessionary loan is a loan granted to or received by an entity on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- It is settled at a future date.

A financial asset is:

- cash;
- a residual interest of another entity; or
- a contractual right to:
  - receive cash or another financial asset from another entity; or
  - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;

# West Rand District Municipality

(Registration number DC48)

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

## Accounting Policies

---

### 1.9 Financial instruments (continued)

- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
  - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
  - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
  - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
  - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

#### Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

| Class                                  | Category                                   |
|--|--|
| Long term debtors                      | Loans and receivables                      |
| Receivables from exchange transactions | Loans and receivables                      |
| Short term investments                 | Financial asset measured at amortised cost |

The entity has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

| Class                               | Category                                       |
|-------------------------------------|--|
| Other financial liabilities         | Financial liability measured at amortised cost |
| Payables from exchange transactions | Financial liability measured at amortised cost |
| Unspent Conditional grants          | Financial liability measured at amortised cost |
| Overnight Bank Facility             | Financial liability measured at Fair value     |

#### Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

#### Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

### 1.10 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

#### Finance leases - lessor

The municipality recognises finance lease receivables as assets on the statement of financial position. Such assets are presented as a receivable at an amount equal to the net investment in the lease.

Finance revenue is recognised based on a pattern reflecting a constant periodic rate of return on the municipality's net investment in the finance lease.

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

## Accounting Policies

---

### 1.10 Leases (continued)

#### Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease. The municipality does not recognise any finance charges on leases where there is no interest rate implicit in the lease.

The interest rate implicit in the lease is the discount rate that, at the inception of the lease, causes the aggregate present value of:

- (a) the minimum lease payments; and
- (b) the unguaranteed residual value

to be equal to the sum of (i) the fair value of the leased asset; and (ii) any initial direct costs of the lessor.

A finance lease gives rise to a depreciation expense for depreciable assets as well as finance expense for each accounting period. The depreciation policy for depreciable leased assets shall be consistent with that for depreciable assets that are owned, and the depreciation recognised shall be calculated in accordance with the Standard of GRAP on Property, Plant and Equipment and the International Accounting Standard on Intangible Assets. If there is no reasonable certainty that the lessee will obtain ownership by the end of the lease term, the asset shall be fully depreciated over the shorter of the lease term and its useful life.

Any contingent rents are expensed in the period in which they are incurred.

#### Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

#### Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

### 1.11 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

# West Rand District Municipality

(Registration number DC48)

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

## Accounting Policies

---

### 1.11 Inventories (continued)

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

### 1.12 Impairment of non-cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

### Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also test a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

### Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

## **West Rand District Municipality**

(Registration number DC48)

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

### **Accounting Policies**

---

#### **1.12 Impairment of non-cash-generating assets (continued)**

##### **Recognition and measurement**

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

##### **Reversal of an impairment loss**

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

#### **1.13 Employee benefits**

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

Termination benefits are employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

### **Accounting Policies**

---

#### **1.13 Employee benefits (continued)**

##### **Post-employment benefits**

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

# West Rand District Municipality

(Registration number DC48)

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

## Accounting Policies

---

### 1.13 Employee benefits (continued)

#### Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the entity recognise actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Assets held by a long-term employee benefit fund are assets (other than non-transferable financial instruments issued by the reporting entity) that are held by an entity (a fund) that is legally separate from the reporting entity and exists solely to pay or fund employee benefits and are available to be used only to pay or fund employee benefits, are not available to the reporting entity's own creditors (even in liquidation), and cannot be returned to the reporting entity, unless either:

- the remaining assets of the fund are sufficient to meet all the related employee benefit obligations of the plan or the reporting entity; or
- the assets are returned to the reporting entity to reimburse it for employee benefits already paid.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognise past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends or similar distributions and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The entity account not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the entity's informal practices. Informal practices give rise to a constructive obligation where the entity has no realistic alternative but to pay employee benefits. An example of a constructive obligation is where a change in the entity's informal practices would cause unacceptable damage to its relationship with employees.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The entity measure the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

# West Rand District Municipality

(Registration number DC48)

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

## Accounting Policies

---

### 1.13 Employee benefits (continued)

The entity determine the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The entity recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

#### Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
  - those changes were enacted before the reporting date; or
  - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

### 1.14 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

## West Rand District Municipality

(Registration number DC48)

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

### Accounting Policies

---

#### 1.14 Provisions and contingencies (continued)

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
  - the activity/operating unit or part of a activity/operating unit concerned;
  - the principal locations affected;
  - the location, function, and approximate number of employees who will be compensated for services being terminated;
  - the expenditures that will be undertaken; and
  - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 37.

Determining whether an outflow of resources is probable in relation to financial guarantees requires judgement. Indications that an outflow of resources may be probable are:

- financial difficulty of the debtor;
- defaults or delinquencies in interest and capital repayments by the debtor;
- breaches of the terms of the debt instrument that result in it being payable earlier than the agreed term and the ability of the debtor to settle its obligation on the amended terms; and
- a decline in prevailing economic circumstances (e.g. high interest rates, inflation and unemployment) that impact on the ability of entities to repay their obligations.

Where a fee is received by the municipality for issuing a financial guarantee and/or where a fee is charged on loan commitments, it is considered in determining the best estimate of the amount required to settle the obligation at reporting date. Where a fee is charged and the municipality considers that an outflow of economic resources is probable, an municipality recognises the obligation at the higher of:

- the amount determined using in the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets; and

## West Rand District Municipality

(Registration number DC48)

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

### Accounting Policies

---

#### 1.14 Provisions and contingencies (continued)

- the amount of the fee initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the Standard of GRAP on Revenue from Exchange Transactions.

#### 1.15 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services); and
- Contracts should relate to something other than the routine, steady, state business of the entity – therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.

#### 1.16 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

#### Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

#### Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

# West Rand District Municipality

(Registration number DC48)

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

## Accounting Policies

---

### 1.16 Revenue from exchange transactions (continued)

#### Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by the proportion that costs incurred to date bear to the total estimated costs of the transaction.

#### Interest, royalties and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

Dividends or similar distributions are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

### 1.17 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by an municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arise when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

# West Rand District Municipality

(Registration number DC48)

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

## Accounting Policies

---

### 1.17 Revenue from non-exchange transactions (continued)

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, an municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

### Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

### Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

### Transfers

Apart from Services in kind, which are not recognised, the municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

## **West Rand District Municipality**

### **Accounting Policies**

---

#### **1.17 Revenue from non-exchange transactions (continued)**

##### **Fines**

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

##### **Gifts and donations, including goods in-kind**

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

##### **Services in-kind**

Services in-kind are not recognised.

#### **1.18 Comparative figures**

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

#### **1.19 Unauthorised expenditure**

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### **1.20 Fruitless and wasteful expenditure**

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### **1.21 Irregular expenditure**

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

## Accounting Policies

---

### 1.21 Irregular expenditure (continued)

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

### 1.22 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by functional classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2016/07/01 to 2017/06/30.

The budget for the economic entity includes all the entities approved budgets under its control.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

### 1.23 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the local sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

### 1.24 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

### **Accounting Policies**

---

#### **1.24 Events after reporting date (continued)**

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

### 2. New standards and interpretations

#### 2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

| Standard/ Interpretation:   | Effective date:<br>Years beginning on or<br>after | Expected impact: |
|---|---|------------------|
| <ul style="list-style-type: none"> <li>GRAP 108: Statutory Receivables</li> </ul> | 01 April 2016                                     | Not material.    |

#### 2.2 Standards and Interpretations early adopted

The municipality has chosen to early adopt the following standards and interpretations:

| Standard/ Interpretation:  | Effective date:<br>Years beginning on or<br>after | Expected impact: |
|--|---|------------------|
| <ul style="list-style-type: none"> <li>GRAP 20: Related parties</li> </ul> | 01 April 2017                                     | Not material.    |

#### 2.3 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2017 or later periods:

| Standard/ Interpretation:   | Effective date:<br>Years beginning on or<br>after   | Expected impact:  |

Annual Financial Statements for the year ended 30 June 2017

### Notes to the Annual Financial Statements

| Figures in Rand | 2017 | 2016 |
|-----------------|------|------|
|-----------------|------|------|

#### 8. Biological assets that form part of an agricultural activity (continued)

##### Non - Financial information

##### Quantities of each biological asset

|                             |           |         |
|-----------------------------|-----------|---------|
| Biological assets - Flowers | 1,112,131 | 972,123 |
|-----------------------------|-----------|---------|

The municipality performed a physical verification of all biological assets at 30 June 2017

A register of all biological assets is available at the Local Economic Development (LED) office of the WRDM for inspection.

##### Methods and assumptions used in determining fair value

The fair value of the different varieties of plants(flowers) were determined by the Multiflora Auction Market. Multiflora Auction Market is the outlet through which the flowers are sold. The increase in fair value is due to more flowers planted which were valued at year-end.

#### 9. Investment property

|                     | 2017                |   |                | 2016                |   |                |

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

The effective date of the revaluations was 30 June 2017. Revaluations were performed by an independent valuer, DB Grobler (Appraiser and Professional Associated Valuer). DB Grobler is not connected to the municipality and has recent experience in location and category of the investment property being valued.

The valuation was based on rental income payable by BP Southern Africa in terms of the signed rental agreement using the income capitalisation approach.

These assumptions are based on current market conditions.

Amounts recognised in surplus and deficit for the year:

| Post-Retirement Medical Obligation (Non-Current)  | 50,375,161        | 51,810,481        |
| Post-Retirement Medical Plan Obligation (Current) | 1,565,525         | 1,554,396         |
|   | <b>51,940,686</b> | <b>53,364,877</b> |

#### Defined benefit plan

An actuarial valuation has been performed of the liability in respect of post-employment benefits to employees and retirees of the WRDM, and to their registered dependants as at 30 June 2017. An independent Actuarial Valuer, which is One Pangaea Financial was appointed by the Municipality to perform these valuations. The company is practising according to the conditions and requirements of the Actuarial Society of South Africa. D.T. Mureriwa is a qualified member of the Actuarial Society of South Africa.

The valuation considers all employees, retired employees and their dependants who participate in the medical aid arrangements and are entitled to a post-employment medical aid subsidy. The post-employment medical aid subsidy liability is not a funded arrangement, i.e no separate assets have been set aside to meet this liability. The Accounting Standards require that an employer's liability be based on the cost of the benefits provided by the employer.

The Medical Schemes Act 1998 enforces community ratings which means that the contributions payable by retirees are the same as those paid by younger members. The employer's cost can therefore be taken as the expected contributions only, as opposed to the expected cost of actual medical aid benefits.

#### Post retirement medical aid plan

The municipality offers employees and continuation members the opportunity of belonging to one of several medical aid scheme, most of which offers a range of options pertaining to the levels of cover. Upon retirement a retired employee may continue membership of the medical aid scheme. Upon a member's death-in-service or death-on-retirement the surviving dependants may continue membership of the medical scheme.

#### Changes in the present value of the defined benefit obligation are as follows:

|  |                   |                   |
|--|-------------------|-------------------|
| Opening balance  | 53,364,877        | 59,400,737        |

## West Rand District Municipality

(Registration number DC48)

Trading as West Rand District Municipality

Annual Financial Statements for the year ended 30 June 2017

### Notes to the Annual Financial Statements

| Figures in Rand | 2017 | 2016 |
|-----------------|------|------|
|-----------------|------|------|

#### 16. Employee benefit obligations (continued)

##### Key assumptions used

Assumptions used at the reporting date:

|                             |        |        |
|-----------------------------|--------|--------|
| Discount rates used         | 9.93 % | 9.54 % |
| Health cost inflation       | 8.30 % | 8.58 % |
| Consumer price inflation    | 6.80 % | 7.08 % |
| Net effective discount rate | 1.51 % | 0.89 % |

##### Medical Scheme Arrangements

The Municipality offers employees and continuation members the opportunity of belonging to one of several medical schemes, most of which offer a range of options pertaining to levels of cover.

##### Contribution Rate Structure

Members contribute according to tables of contribution rates which differentiate between them on the type and number of dependants. Some options also differentiate on the basis of income.

##### Financial Assumptions

**Discount Rate:** GRAP 25 stipulates that the choice of this rate should be derived from government bond yields consistent with the estimated term of the post-employment liabilities. However, where there is no deep market in government bonds with a sufficiently long maturity to match the estimated term of all the benefit payments, current market rates of the appropriate term should be used to discount shorter term payments, and the discount rate for longer maturities should be estimated by extrapolating current market rates along the yield curve

Consequently, a discount rate of 9.93% per annum has been used. These rates do not reflect any adjustment for taxation. These rates were deducted from the yield curve obtained from the Bond Exchange of South Africa after the market closed on 30 June 2017.

##### Key Demographic Assumptions

The normal retirement age of employees is 65. It has been assumed that in-service members will retire at age 63, which then implicitly allows for expected rates of early and ill-health retirement.

It has been assumed that 100% of in-service members will remain on the municipality's health care arrangement should they stay until retirement.

It has been assumed that female spouses will be four years younger than their male counterparts. Further, we've assumed that 95% of eligible employees on a health care arrangement at retirement will have an adult dependant. For current retiree members, actual marital status was used and the potential for remarriage was ignored.

|--|-------------------|----------|

It is municipality policy to lease fire engines & rescue vehicles and computer equipment (Councillors laptops) under finance leases.

The average lease term 3 years for Fire engines/ rescue vehicles and 2 years for computer equipment.

All leases have fixed repayments and no arrangements have been entered into for contingent rent.

The Municipality has not recognised finance cost on lease of fire engines and rescue vehicles in accordance with applicable accounting policy of the WRDM.

## Notes to the Annual Financial Statements

| Figures in Rand | 2017 | 2016 |
|-----------------|------|------|
|-----------------|------|------|

### 39. Prior period errors

#### Receivables from exchange transactions

Accrued income for funds expected from Shatadi Auctioneers relating to fixed assets auctioned in the previous financial period on 23 June 2016 was not raised. In addition, there are also receivable balances which arose from initial system conversion (from BIQ to Munosft) and these balances never had movement since 2011/2012 financial period. These balances were written off by Council as per new mSCOA requirements.

#### Cash & cash equivalents and general expenses

During the 2015/2016 audit, management was requested by Auditor General to process an adjustment on the annual financial statements with regards to cash and cash equivalents (Audit adjustment). The cashbook and bank statement balance had a difference of R6.2 million due to long outstanding reconciling items on the bank reconciliation statement which were largely caused by system upgrade performed on the 29 June 2016. The difference was recorded as "material losses" on the bank reconciliation. In addressing the issue, management have reconciled the cash book and bank statement of 2015/16. The prior period adjustment were processed against the material loss on bank reconciliation expense account.

#### Long-term receivables

Management has noted that the reported balance of 2015/16 of study loans were incorrectly stated. Study loan assistance account was reviewed and total error identified. The error relates to inclusion of employees who have either completed their study assistance obligations or were no longer in the employ of the municipality. The correction of the error also affects debt write off account in 2015/2016 financial period.

#### Property, plant and equipment

The Municipality's fixed assets were assessed in terms of the paragraph 56 of GRAP 17. This has affected the opening balance of accumulated depreciation and the movement of depreciation of the current. There were also additions to fixed assets that were erroneously expensed instead of being capitalised in the 2015/2016 financial period. There are also disposals which were not effected in 2015/2016 financial period and Council has approved the transfers of those assets to FBA's.

#### Payables from exchange transactions and VAT receivables

Creditors accruals recorded in the incorrect accounting period were reversed and this has also affected VAT receivables.

The correction of the error(s) results in adjustments as follows:

| Statement of Financial position        | As Previously Reported | Change in accounting policy | Re-Classification | Correction of error | Restated Balance |
|--|------------------------|-----------------------------|-------------------|---------------------|------------------|
| Cash and cash equivalents              | 13,901,194             | -                           | -                 | (1)                 | 13,901,193       |
| Receivables from exchange transactions | 27,910,111             | -                           | -                 | (233,604)           | 27,676,507       |

## Notes to the Annual Financial Statements

| Figures in Rand | 2017 | 2016 |
|-----------------|------|------|
|-----------------|------|------|

### 40. Events after the reporting date

There were no events or transactions which occurred after 30 June 2017 that require a disclosure or adjustment in the Annual financial statements of West Rand District Municipality.

### 41. Risk management

#### Financial risk management

#### Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

### 42. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

### 43. Unauthorised expenditure

No unauthorised expenditure as at 30 June 2017.

### 44. Fruitless and wasteful expenditure

|                                      |              |              |
|--------------------------------------|--------------|--------------|
| Opening balance                      | 5,040        | 1,802        |
| Penalties on late submission to SARS | -            | 3,238        |
| Condoned by Council through MPAC     | (1,802)      | -            |
|                                      | <b>3,238</b> | <b>5,040</b> |

During 2016/2017 financial year MPAC has tabled the report to Council to condone fruitless and wasteful expenditure amounting to R1,802 which was incurred during 2011/2012.

### 45. Irregular expenditure

|   |           |                |
|---|-----------|----------------|

| Current year subscription / fee | 1,846,230        | 1,743,891   |
| Amount paid - current year      | -                | (1,743,891) |
|                                 | <b>1,846,230</b> | <b>-</b>    |

#### Material losses

|                    |                  |                  |
|--------------------|------------------|------------------|
| Opening balance ^^ | 4,086,502        | 4,000,000        |
| Current year **    | -                | 6,213,226        |
| Amounts matched    | -                | (6,126,724)      |
|                    | <b>4,086,502</b> | <b>4,086,502</b> |

\*\* Material expenditure/ losses recognised on reconciling items resulting from mSCOA upgrade done on 29 June 2016. Material expenditure/ losses relates to the difference between cashbook and bank statements. The reconciliations were re-performed and amounts on cashbook were matched to the amounts on the bank statement. The total difference unmatched amounts to R86,502.45 and is still being investigated further.

^^ The Accounting Officer opened a criminal case with the South African Police Services (SAPS) in terms of Section 52 of the MFMA. The alleged incumbent resigned and has pleaded guilty and the judgement will be passed by Court. Further civil matters has already been pursued to recover the WRDM losses. The internal personnel has already underwent disciplinary procedures and the employee have been dismissed.

|  | <b>1,124,442</b> | <b>3,125,352</b> |

#### 47. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

#### 48. Non-compliance with Laws and Regulations

During the year under review, the municipality utilised Section 45 of the MFMA to access overnight facility to bridge working capital requirement.

Section 45(4)(a) of the MFMA requires that the municipality repays such facility on or before the end of the financial year. The municipality was not able to repay the facility on or before year end.

The relevant Provincial and National Treasury have been duly informed of the instance of non-compliance and this disclosure is made in accordance with Section 125(2)(e) and (f) of the MFMA.
